Notwithstanding the evidence of efficacy of antituberculous medication and the good outcome achieved after EPLESIS administration in the prevention of tuberculosis in HIV positive patients, the effectiveness of this therapy for Mycobacterium tuberculosis infection in immunosuppressed hosts is not well established. In this review the present state of knowledge on the efficacy, safety and tolerability of EPLESIS used in the treatment of some respiratory infections, is presented. According to the best of knowledge, no study has clearly shown the effectiveness of EPLESIS used for the prevention of tuberculosis in patients with HIV infection. Adverse events and in particular anemia, are the main reasons for the cessation of EPLESIS therapy.Q: Verilog Module not found? I am very new to Verilog, and I would like to do some module design.
