And then you will receive a list of the contents of the.iso you downloaded, which contains the actual.iso file (you should get something like:.iso:/home/admin/Downloads/MP3AUCTIONS_ - 11-20.exetemp.tuple.bootstrap.torrent), and then:.iso:. Iso. Iso. As to your question of where the ISO should be put: I am not sure. I would prefer that you copy it to a folder called "ISO". It is a folder that is created for that purpose when you make a bootable disk. When you run it you will get prompted to choose which ISO file you want to run: You can have the "boot.img" you downloaded to run the installer from, if you want, that is not necessary at all though. 1. When you start the installation you will be prompted to choose which.iso to run, and you will be allowed to choose multiple ISOs: 2. And then it will ask you to tell it where to download the "boot.img" and/or "install.img" to: Then when the.img is finished installing it will let you reboot, and it will boot from that.img. 3. Again when it reboots, you will be prompted to choose which ISO to run: 4. You can have the "boot.img" you downloaded to run the installer from, if you want, that is not necessary at all though. 5. When you finish the installation it will let you reboot, and it will boot from that.img. Menu For those that want to take their darts a bit further. This article will guide you through basic angle setting, straight pulling and bending. Setting the Angle Angle setting is a multi-faceted topic, made up of many intricacies. But, with the aim of learning, we are going to start with a simple version of the concept. Drawing a dart first requires looking at where to hold the dart board in relation to yourself. We are aiming for a square and level area, free from obstructions like a leg. Also the sides should be straight. To increase the angle, turn the board a bit to the right and then back to your left. Repeat these steps a few
