I am currently using Maven 2.x with the "super POM" archetype. The structure of my project is: App A (Maven project) App A-S (Maven Sub-project) App B (Maven project) App B-S (Maven Sub-project) In each Maven Sub-project, the sub-module jars are put into a lib folder (the default install scope). They contain the packages I wish to use, so my pom is like: App A com.myorg.myproject myproject
