---

relates to a battery cooling apparatus for use in an on-vehicle battery pack, which is mounted to an electric vehicle or a hybrid vehicle. Electric vehicles and hybrid vehicles have been developed as eco-friendly and high-efficient vehicles that have remarkably reduced emissions. In those electric vehicles and hybrid vehicles, a large-capacity power source module including a plurality of batteries is mounted to a vehicle body, and the power source module is charged with power generated by an electric power generator using an engine. Some of the battery modules mounted to the vehicle body are cooled by forcibly circulating air in

---

the vehicle body. This cooling technique using the air is referred to as an air-cooling technique. In air-cooling, a fan
