STEP 1 : First of all, open your game and close it. Now it's going to ask you some terms of installation and license agreement. Read them, it's safe if you don't want to disrupt your device. After that, click on I Accept to continue installing the game. STEP 2 : Once the installation is done, you have to choose your language. If you want, you can download a language pack to change that, but the English option is simple enough. STEP 3 : Select the save data where you want to save your game. Remember that there is no other save game. The ELDEN RING game saves data only on internal memory. STEP 4 : Now it's time to create your character. You can create your character by using the costumes and the characters of other players, but there are some differences. For example, when you create your character, you can have a name, which will remain hidden to other players. In addition, you can decide how many stats will your character have. For that, you have to choose what stats will be there and how many skills will they have. Anyway, choose them carefully because they will determine what your character looks like in the game. The more a stat goes up, the better your defense and constitution will be. STEP 5 : You can unlock additional features of your character when you reach certain level. In fact, some features are more important than others. For example, if you're a Magician, you have to be careful with your Magic rank. Otherwise, the experience points and money that you gain will be less. This will also slow down the

leveling process. STEP 6 : After you create your character, you can start the adventure! If you have an internet connection, you can start playing the game. If not, you can play offline. Tips : Every time you save your game, you can check what your character looked like before and what you had to do to change it. If you don't like it, you can change it again. If you want to change your character and save the game in the same file, click on the file name in the bottom right corner of your desktop. The present invention relates to a collapsible box (or body) of a toy machine (or vehicle). The collapsible box is particularly suitable for use as a seat or a seat bottom of a vehicle, or for sand table or racing game. A highly popular and ever-growing toy is an electronic toy, consisting of operation circuits, a control unit, speaker and a talking device, mounted in a box for transportation, storage or operation. Generally, the box is made of metallic material, and simply in a box having two opposite side walls of peripheral shape of same two opposite end walls and two opposite side flaps extending upwardly therefrom for covering the two opposite end walls. Besides using metallic material, the box may also be made of synthetic material, for example, plastics, etc. However, the two adjacent end walls of the box, as well as the opposite side walls connecting the two adjacent end walls in a same plane, are all constructed in a similar depth. Therefore, although the playing time is relatively short, a large volume of material is frequently consumed for assembly of the box. Because of the limitation of the size of the box, the operational time of the circuits and components is short. Besides, the performance of the circuits and components is not as good as those required for a more sophisticated toy.Personally, I'd pay
