Chicago's special election to fill the seat vacated by the death of former President Barack Obama shows the Republican Party — in the midst of its sharp ideological civil war — is struggling with the high-profile departure of the most liberal congressional Democrat in more than 30 years. Democrats hold a 52-48 majority in the U.S. House of Representatives. A year-end special election in Illinois is likely to significantly add to the Democrats' edge. President-elect Donald Trump lost the state's 17th Congressional District to Democrat Hillary Clinton by nearly 4.5 points, making the Chicago-based district one of the most closely watched for Democrats in the country. "This is going to be the main congressional race in the country," said Democratic consultant David Axelrod. "Whoever wins it is going to be the Democratic nominee for the Congress in a

Clinical practice guideline for the prevention and treatment of community-acquired pneumonia in adults: a systematic review of the evidence for the CAPbio 2012 update. The original CAPbio guidelines were published in 2005, and have since been used to support guidelines for the management of community-acquired pneumonia (CAP) in the USA and Europe. They are supported by a Cochrane review of the evidence. To update the guidance on the prevention and treatment of CAP through a systematic review of the literature conducted in accordance with the Cochrane Handbook for Systematic Reviews of Interventions. The authors searched the Cochrane Central Register of Controlled Trials, MEDLINE, EMBASE, CINAHL and the Science Citation Index until March 2012 for randomised controlled trials. They also contacted international CAP experts and contacted the authors of previous reviews of CAP to locate publications of other studies not included in the previous Cochrane review. Randomised controlled trials or quasi-randomised controlled trials investigating the effectiveness of any intervention for the prevention or treatment of CAP published in any language, and with follow-up of at least 48 hours. The authors identified 28 eligible studies (eight relevant to prevention, 18 relevant to treatment) and assessed the evidence according to GRADE criteria. The authors conducted one review of two prevention studies (n = 2938) and 10 reviews of 17 treatment studies (n = 6d1f23a050
