## What's New in the Sepham I USE VOICE?

Sepham I USE VOICE allows you to control all software, hardware and applications connected to your computer. Control them with your voice. Don't have to remember any codes to control the device, don't even know how it works, you can control almost every single device in your computer. The application can control most of the software that you use every day, and more. If you are a big fan of the windows operating systems, SEPHAM I USE VOICE will have everything you need to control anything that you want to be control. If you don't like windows you can use it also with the MAC OS, or use the Linux platform. **Functionality:**

- **Programs / Processes:** You can use the application to control most of the programs you use every day. This includes all the software you use on your computer, and many hardware devices connected to the computer. Control even the applications that don't usually have a control window, the application allows you to control it with your voice, and you can be always in control.
- **Hardware:** You can control hardware devices, including printers, CD, DVD and hard drive. If you have never controlled anything before, you can do so with simply and easy commands.
- **Audio / Video:** This is the biggest range of supported devices, and one of the most powerful applications you will ever see. You can control MP3, Video, and music players with your voice. Not only you can control your music player, but you can also play and change your music tracks just by asking for it. And if you don't know how to work with audio devices, don't worry, we made the application to be user-friendly and easy to use, it will take you only 5 minutes to control your audio players.
- **External software:** In the application you can control many external software. The most common example is the.exe files. You can control the installation process of any file in the computer, and even change the files that you don't want to be installed or change the file you want to be installed. The most common example of this is the software that you download from the internet, you can always control the installation process, and if you have something you don't like, you can change it for something you want to be installed.
- **Internet:** You can control almost all the software that you download from the internet with the application. You can pause or stop the download, you can change the size of the files you are downloading, and even change the kind of programs that you want to be installed. You can install or remove programs from the browser with the application.
- **Hardware devices:** You can control all the devices that are connected to your computer.

## **System Requirements:**

\*This version of the game will only be available for the following operating systems: Windows Mac Linux Important: The Battle Islands DLC must be installed separately. You must use the original Bioshock Multiplayer save file from the Steam version of the game. If you already own a retail copy of the game, a Steam copy, or a copy of the Bioshock 2 Multiplayer DLC on PC, then you can use the original file. If you did not get the Battle Islands DLC with your purchase of the game
