### What's New in the?

Useful and simple password and hash tool Password Generator & Hash Calculator is a simple, but very useful utility that will help you create strong passwords, hashes and copy-paste text values. The program features a simple design and is a perfect app for those who want to generate strong and secure passwords. It also allows you to quickly compute hashes, copy-paste text and generate passkeys, and it includes a list of available algorithms. Automatically enter passwords You can enter multiple passwords and get the hash value of each of them in one go. Once you have the text, you can simply paste it into another text editor or application to see if it is identical to the original. Safe and strong passwords The program includes a list of algorithms that you can use to generate secure passwords: the MD5, SHA1, SHA256, SHA512 and SHA256 algorithms, as well as Blowfish, Spooky and Twofish. It also features a number of parameters, including character sets, minimum and maximum length of passwords. Share passwords securely Since the application can generate multiple passwords at once, you don't have to remember them. This means that you can safely share them with other people

and you don't have to worry about your personal information.

Compatible with Windows 7, 8, 8.1 and 10 Installation is as easy as a double-click. The application has no external dependencies and should run on any Windows 7, 8, 8.1 and 10 desktop operating system.

Password Generator & Hash Calculator features include: \* calculate and compare hash values \* generate random passwords \* copy-paste text values \* copy-paste files from USB drives \* copy-paste text from clipboard \* generate secure passwords \* safe and strong passwords \* generate strong and secure passwords

Key Features of Password Generator & Hash Calculator

1. Generate secure passwords for accounts You can generate multiple passwords at once using the program and then copy-paste the values to paste them into the corresponding fields. In this way, you will be sure that they are exact copies of the original values and the rest of the fields will show in green if the password was generated correctly.

2. Generate hashes The program can be used to calculate and compare hash values of various files and text. This means that you can easily verify that the files you downloaded have not been altered in some way or that the text you are copying from the web has not been damaged in any way.

3. Safe and strong passwords You can use the application to generate secure passwords. The program is very intuitive and the parameters are very flexible. The minimum and maximum length of the passwords is among the options. You can set how many passwords should be generated, and there are different algorithms included.
4. Copy-paste text values The application features a tab that

## **System Requirements:**

Operating System: Windows 98/XP/2000/Vista/7/8/8.1/10 Memory: 1 GB of RAM Graphics: Intel GMA 3150 is required Processor: Intel Core 2 Duo, AMD Athlon 2.8 GHz or above DVD-RAM Drive: 320 Mb or above Hard Disk: 700 Mb or above DirectX: 9.0 Network:
